Journal of Aquatic Ecosystem Health

Contents of Volume 4, 1995

Vol. 4 No. 1

C.K. Minns: Approaches to assessing and managing cumulative ecosystem change, with the Bay of Quinte as a case study: an essay 1–24
L. Håkanson: Models to predict lake annual mean total phosphorus 25–58
V. Conforti, J. Alberghina & E. Gonzalez Urda: Structural changes and dynamics of the phytoplankton along a highly polluted lowland river of Argentina 59–75

Vol. 4 No. 2

K.R. Munkittrick & L.S. McCarty: An integrated approach to aquatic ecosystem health: top-down, bottom-up or middle-out? 77–90
J. Cairns Jr. & B.R. Niederlehner: Ecosystem health concepts as a management tool 91–95
D.J. Rapport: Ecosystem services and management options as blanket indicators of ecosystem health 97–105
F.R. Lichtkoppler, M.A. Berry & D.O. Kelch: Lake Erie sport and boat show patrons rank Great Lakes ecosystem health issues in 1993 and 1994 107–115
J.H. Leach: Non-indigenous species in the Great Lakes: were colonization and damage to ecosystem health predictable? 117–128

Objectives 129
Membership Application Form 130

Announcement 131

Vol. 4 No. 3

G.T. Ankley & M.K. Schubauer-Berigan: Background and overview of current sediment toxicity identification evaluation procedures 133–149
G.A. Burton, Jr.: Critical issues in sediment bioassays and toxicity testing 151–156
J.M. Besser, J.A. Kubitz, C.G. Ingersoll, W.E. Braselton & J.P. Giesy: Influences on copper bioaccumulation, growth, and survival of the midge, *Chironomus tentans*, in metal-contaminated sediments 157–168
K.R. Munkittrick, B.R. Blunt, M. Leggett, S. Huestis & L.H. McCarthy: Development of a sediment bioassay to determine bioavailability of PAHs to fish 169–181
P.M. Chapman: Sediment quality assessment: status and outlook 183–194

T. MURPHY, A. MOLLER & H. BROUWER: *In situ* treatment of Hamilton Harbour sediment 195–203

A. GERHARDT & L. JANSSENS DE BISTHOVEN: Behavioural, developmental and morphological responses of *Chironomus* gr. *thummi* larvae (Diptera, Nematocera) to aquatic pollution 205–214

Aquatic Ecosystem Health and Management Society
Objectives 215
Membership Application Form 216
Call for Papers and Conference Details 217–219

Announcement 220

Vol. 4 No. 4

M. ANDRÉASSON & G. DAVE: Transfer of heavy metals from sediment to fish, and their biliary excretion 221–230

K.M. STEWART & R.S. THOMPSON: Fluoranthene as a model toxicant in sediment studies with *Chironomus riparius* 231–237

K.L. BARRETT: A comparison of the fate and effects of prochloraz in artificial and natural sediments 239–247

B. PINTO, D. PELLEGRINI, M. GABELLINI & A. AUSILI: Harbour and coastal sediment chemistry and toxicity: a preliminary assessment of dredging activities 249–255

P.J. DEN BESTEN, C.A. SCHMIDT, M. OHM, M.M. RUYS, J.W. VAN BERGHEM & C. VAN DE GUCHTE: Sediment quality assessment in the delta of rivers Rhine and Meuse based on field observations, bioassays and food chain implications 257–270

J.M. LOURENS, A.P.M.A. VONCK, C. VAN DE GUCHTE, J. HARTNACK & J. STRONKHORST: Sediment toxicity testing of lightly contaminated dredged material in the Netherlands 271–275

H.H. VAHL, L. KARBE, M.-J. PRIETO-ALAMO, C. PUEYO & J. WESTENDORF: The use of the *Salmonella* BA9 forward mutation assay in sediment quality assessment: mutagenicity of freshly deposited sediments of the River Elbe 277–283

A. BROBERG, L. MALMGREN & M. JANSSON: Relations between resuspension and the content of ^{137}Cs in freshwater fish in some Swedish lakes 285–294

C.M.L. MESTERS: Shifts in macrophyte species composition as a result of eutrophication and pollution in Dutch transboundary streams over the past decades 295–305
